

# Dough Handling

Hydraulic divider

# D1224

## Description

The D1224 automatic hydraulic dividers are designed for bakery and pastry applications, excluding any other type of uses. The use of an automatic divider allows the automatic division of the dough in equal pieces.

This machine replaces the manual divider, gaining time and giving more precision.

## Features

- 12,24 or 48 divisions
- Easy cleaning and maintenance thanks to removable jackets
- Patented device against flour projection , *the dusted flour is recuperated in a removable drawer at the back of the machine*
- Electronic control panel with tight simplified keys to operate the machine

## Machine Reference

| Reference | Model                   |
|-----------|-------------------------|
| FG329     | D1224 Hydraulic divider |

## Options

- Removable grid, grid support and safety control for 48 divisions
- Half tank function for D12/24
- Automatic cycle stop, manual cover opening
- Manual opening if electricity cut

## Dimensions:

|                    |                            |
|--------------------|----------------------------|
| Height:            | 1175mm                     |
| Height open cover: | 1775mm                     |
| Width:             | 820mm                      |
| Depth:             | 965mm                      |
| Weight:            | 230kg                      |
| Power:             | 3 Phase; 1.5kW; 50Hz; 415V |

## Capacity:

|                   |            |
|-------------------|------------|
| Number divisions: | 12,24 & 48 |
|-------------------|------------|
