

Roto-Cooler

Description

The Roto-Cooler is a rotating round tray which is powered by a connection to the Donut Robot fryers. It is the most practical way to collect, hold and cool the donuts as they come off the fryer. As the standard Roto-Cooler is large enough to hold approximately 75 donuts, it allows the operator to be occupied with other jobs before transferring the contents.

Features

- White, easy to clean, high density polyethylene tray
- Spun and polished heavy gauge aluminium base

Machine Reference

Reference	Model
FG369	Roto-cooler

Dimensions:

Height: 18cm
Diameter: 61cm
Approx shipping weight: 7.5 kg
Power: Single phase (connected to fryer); 0.3A; 110V; 50/60Hz; 35W
