

Transfer Pump

Description

The Bakon Transfer Pump is a unique mobile system designed for pumping a variety of different substances from a bowl or container, into a hopper. The pump is made on a stainless steel frame with adjustable height. It is suitable for many products such as fruit fillings, creams, cake and muffin batters etc.

Fillings containing pieces of fruit and whole cherries can also be used, as the cherries remain whole and the fruit is not crushed.

Features

- Easy to clean
- Larger suction tube for a higher volume product
- Level indicator
- Pump can be integrated into an existing production line
- Larger pump cylinder available for heavier products
- Manual or pneumatic height adjustment

Machine Reference

Reference	Model
FG321	Transfer pump

Dimensions:

Height:	1900mm – 3000mm
Width (frame):	850mm
Total length (frame):	1300mm
Length suction tube:	825mm
Output:	1.2ltr/stroke at 40 strokes/min.
Operating pressure:	6 bar
Air consumption:	12 liter/stroke at 6 bar
