

Job Vacancy - Service Engineer

MONO Equipment currently has a vacancy for an experienced Service Engineer to join our small Engineering Team and Technical Support staff both in the field and through the 'Tech Support Helpdesk'. The successful candidate will also need to become a product specialist on MONO's core equipment ranges – in particular on our Confectionery Depositor range.

The Ideal Candidate will Have:

- A multi-skilled or electrical engineering background with emphasis on machine control systems, including servo & stepper motors, 3-phase and single-phase circuits
- A logical / analytical approach to diagnosing machine problems
- Good communication and management skills
- A willingness to travel in the UK and overseas to install, commission and train on MONO/Third Party bakery equipment
- A flexible attitude to working
- Good computer literacy

Qualifications:

- Qualified Electrician
- Ideally a background working in the bakery/foodservice industry or with bakery equipment

The salary and benefits package will be discussed in further detail at the interview stage.

If you are interested in this position then please send your CV and covering letter to:
