

The Ultimate Baking Experience...

All bakeries need some form of baking oven and it is in this area where MONO Equipment truly excels.

MONO Equipment is renowned for designing and manufacturing specialist bakery equipment and has been doing so for over 65 years. This legacy of British Craftsmanship, employing time-honoured skills, now combines with the very latest technological advancements to produce some of the most energy efficient convection, rack and deck ovens available on the market today.

Our ovens have an enviable reputation amongst independent bakers, foodservice outlets and large supermarket chains for the quality, consistency and reliability of their bake and set the standard against which all other ovens are measured.

One of MONO's latest innovations, is the NEW BX Eco-Wash Oven which has been specially designed to provide a complete baking and self-cleaning solution; quickly and easily removing all odours and food residues from the oven chamber enabling retailers to switch between different food groups such as bacon and croissants in just 35 minutes.

Following on from the success of our much-loved MX Rack Oven, MONO has just recently also designed a NEW and improved rotary oven which combines the very best features of the MX with a much smaller footprint and energy-saving LED Lights and is now available in either Electric or Gas options.

For smaller retail environments and food-2-go outlets MONO has developed a special range of highly versatile and compact convection ovens. The ovens are perfectly suited to meet the growing needs of today's booming food-2-go market, where space is at a premium but where a robust and reliable oven is needed to bake, roast and heat a varied range of food. The compact range offers a choice of footprints, tray sizes and capacities to suit most needs.

As you would expect from a company with MONO Equipment's pedigree our range of convection, deck and rack ovens all incorporate the very latest energy-saving technology coupled with a highly-intuitive icon-driven, full colour touch-screen controller which ensures the perfect bake each and every time.
