

## DIVIDE, MOULD, AND CONQUER YOUR BREAD PRODUCTION

Making your business more productive is central to every piece of equipment MONO offers. That's why we believe our highly-acclaimed range of Dividers and Moulders are the best that money can buy.

The JAC Paniform Divider Moulder can be set up by just one person and is capable of automatically dividing and moulding up to 900 pieces of dough per hour. Alternatively, the Vitella Bun Divider Moulder is built to optimise your workspace, accurately cutting and shaping dough with an output of up to 9,300 pieces an hour, with a surprisingly small footprint.

For further details on how our Divider Moulder range can help your productivity, contact one of our sales team today.
