

The Bake Zone - Now with Integrated Freezer

The Perfect Solution for Stores with
No Back-of-House Space for an ISB

Innovative equipment
for traditional baking

MONO's Bake Zone system has been designed to provide the perfect solution for stores that simply don't have enough back-of-house space to install even the smallest in-store bakery (ISB).

Building on the original Bake Zone, this model replaces two of the merchandising shelves with a built-in freezer, letting you store frozen stock directly within the unit for faster loading and more convenient baking.

The Bake Zone with Integrated Freezer unit enables stores to add a lucrative product range, which not only helps to boost footfall but also helps to increase average basket values, by providing impulse buys at key times of the day.

The truly enticing aroma of freshly baked products like croissants, pain au chocolat, cinnamon swirls, pastries and bread rolls wafting at customers as they enter the store, not only stimulates their senses but also generates a great sales opportunity.

At just 1.2m wide, the self-contained Bake Zone with Integrated Freezer can be sited anywhere convenient in the store, even in an alcove, and requires just standard 13Amp sockets to operate.

Available with a MONO 3-Tray or 4-Tray Minibake or Minibake Pro convection oven.

10 Key Bake Zone System Features

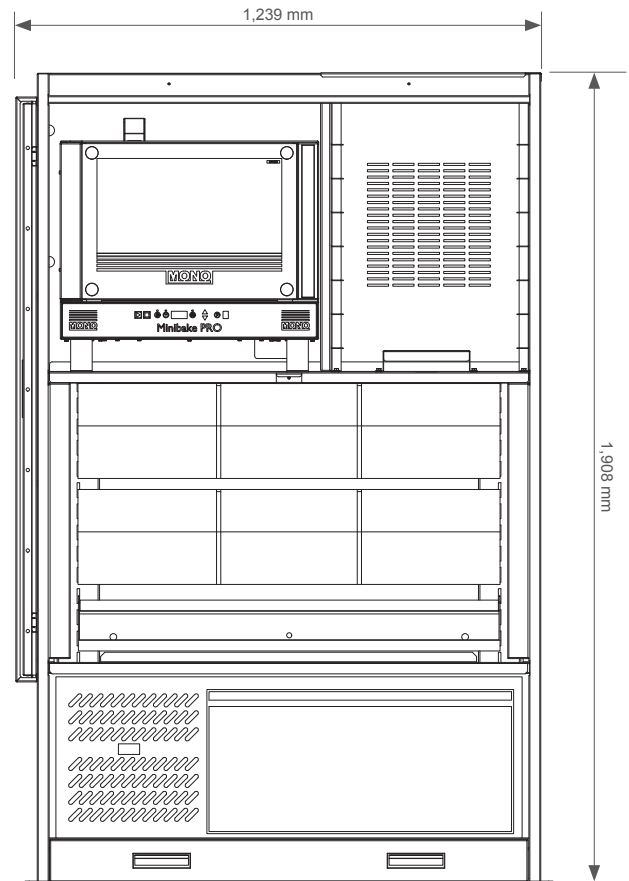

- Self-contained unit can be placed anywhere in the store
- Includes a MONO Minibake / PRO convection oven
- Includes a Williams Chef Drawer Freezer
- Just standard single phase, 13Amp power supply needed
- Integrated rack for storing products before and after baking
- 6 x merchandising cassettes with integral LED lighting
- Customisable pull-out safety panel for customer protection
- Heat resistant blind for use when the oven is baking or still hot
- Integrated areas for customer tongs, bags, oven gloves etc
- Stainless steel construction for ease of cleaning

10 Key Bake Zone System Benefits

- The perfect solution for stores with no back-of-house space for an ISB
- The unit can be positioned anywhere there's 13Amp power supplies
- The Integrated freezer provides quick and convenient oven loading on site
- Provides additional product lines to boost footfall and increase basket values
- Creates a point of interest and theatre in the store
- Small batches can be baked at key times to minimise wastage
- The aroma of freshly baked goods greets customers as they enter the store
- Entices customers to purchase freshly baked products
- Encourages repeat visits and repeat purchases
- Provides advertising opportunities on heat resist blinds and magnetic side panels
