

How to Order Your Power Max Plus Cartridges **Direct from MONO**

MONO's Power Max Plus Cartridge is the very latest generation of oven cleaning detergents which has been specially designed to work with MONO's BX Eco-Wash and Eco Connect+ Wash convection ovens.

Each cartridge contains two wax seals, each with its own melting points, that not only separates the different contents but also enables each one to be delivered exactly when required during the Wash Programmes.

During the wash cycle, the first wax seal melts when the oven reaches the correct temperature and releases the powerful detergent into the oven; this is later followed by the melting of the second wax seal which releases the rinse agent during the rinse cycle phase of the wash programme. The powerful detergent ensures even the most baked-on grime and grease is penetrated and effectively removed.

Each box contains 10 Power Max Plus Cartridges, which are suitable for use with all BX Eco-Wash and Eco Connect+ Wash oven ranges.

To order your box of Power Max Plus Cartridges simply contact our Spares Department and quote the following code: A900-30-030.
